

Mokelumne River Fish Hatchery in San Joaquin County, which operates in partnership with the East Bay Municipal Utility District, is on pace to see record returns of salmon and steelhead this year thanks to a variety of innovative efforts to benefit the fish. Fall run Chinook salmon returns, at 15,000 fish this year, are expected to surpass the 2011 record of 18,000 returning fish by the year's end.

WEATHER OF CONCERN

Weather of Concern

- Fog could become locally dense this weekend so drive with caution if traveling during the nighttime and morning hours through the central valley.
- Wet weather will return again early next week.
- For the Antelope Valley, a freeze warning has been issued for tonight, while even colder temperatures bring the potential for a hard freeze tomorrow night, resulting in the Hard Freeze Watch.
- Crops and sensitive vegetation need to be protected in areas that will likely see freeze conditions, especially tomorrow night in the Antelope Valley due to the potential for hard freeze conditions. In addition, animals should be kept indoors or in a barn.

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

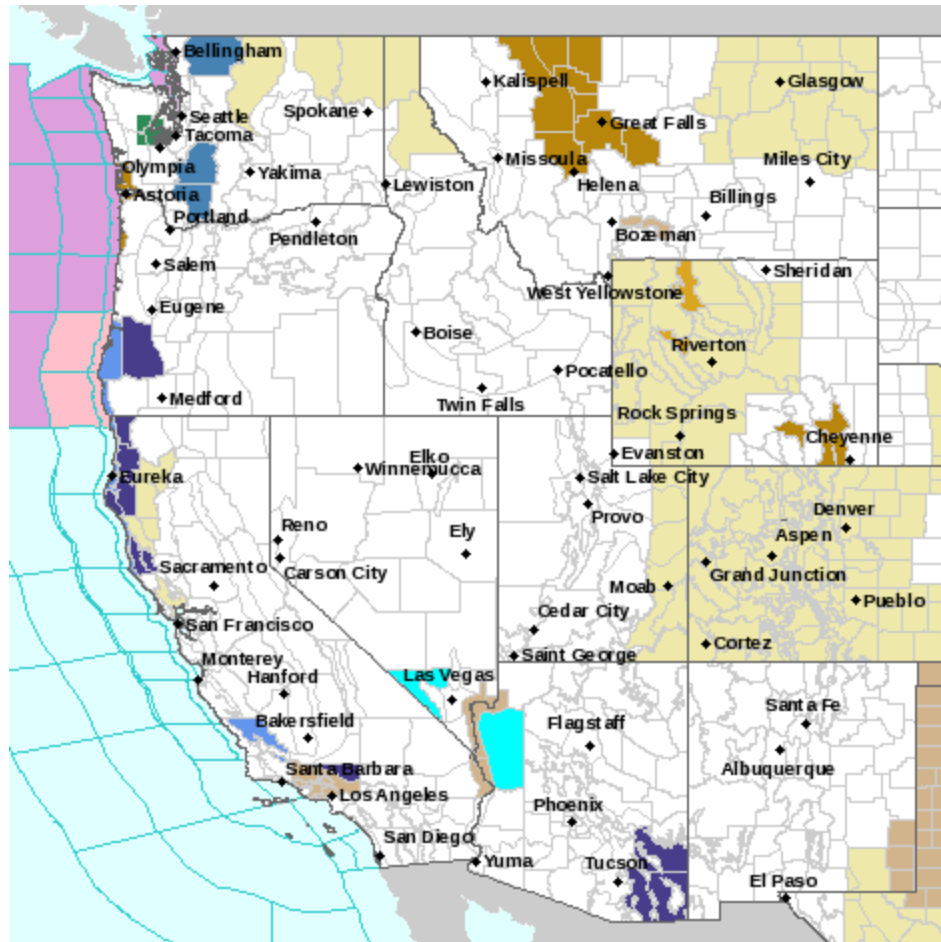

High pressure will produce dry and mild conditions through Sunday. The next Pacific storm system will move in Sunday night and continue over the region on Monday. There will be a period of S-SW winds reaching 20-30 mph with gusts to 45 mph in wind-prone areas along and ahead of the incoming cold front early Monday. Snow levels will be 5000-7000 ft on Monday once the front moves in. The storm will move out of the area Monday night.

Tuesday will be mostly cloudy with increasing southerly winds as another Pacific system approaches. A few light rain showers are expected in western areas early, then spreading to eastern areas in the afternoon. The actual system will move in Wednesday with a period of heavier rain and stronger winds. The system will weaken Wednesday night, and Thanksgiving Day looks partly cloudy and mild with a few rain showers in the mountains.

SOUTHERN CALIFORNIA

Scattered light showers will continue over the southern half of the Sierras and across much of Southern California from the mountains westward. The precipitation should end by early afternoon, except across the Grapevine and Kern County Mountains where upslope flow will keep light precipitation going through the evening. Up to another tenth of an inch may occur in the Sierras with only trace amounts expected over Southern California. Clouds will decrease over most areas during the afternoon and temperatures should reach the 60s at the coast, lower 70s in the valleys to the low 80s in the desert. Tonight, gradients will turn offshore which will allow winds of 15-25 mph with gusts to 35 mph to occur across Southern California. The strongest winds will likely occur from the Santa Clarita Valley toward the Oxnard plain. Slightly weaker offshore winds can be expected Saturday night and Sunday. Temperatures will climb toward 80 in the valleys of Southern California over the weekend. A weak trough entering the northern part of the state will result in cooler, onshore flow next Monday. All precipitation associated with this system will remain north of the area. Next week, high pressure is expected to build over the southern half of the state, resulting in sunny skies and well above normal temperatures. By next Wednesday and Thanksgiving Day, temperatures will be close to 90 in the valleys of Southern California. Minimum RH will drop toward 10 percent, but winds are expected to remain light for the most part. Cooler weather may return for the following weekend. No precipitation is expected after day through the end of the outlook period.
